Experience

Meta

JavaScript (React Native, React, Relay, Jest) + Java + Kotlin + PHP (GraphQL, Blosk) + Python

Senior Software Engineer @ Instagram VR

Dec 2024 –

- Introduced core Instagram features to the VR app including follower metrics, inline feed comments, explore tab search, offline caching, feed seen-state tracking
- Ran experiments to improve UX, resulting in +5.8% fast app launches, +8.1% likes, +2.6% feed freshness
- Led the development and successful rollout of IG Frame, an animated previewing experience on all Meta Quest virtual homes, with 180K monthly active users and 15K monthly referrals to Instagram VR
- Led 8-eng quality surge effort to improve app health, closed 1000+ bugs, introduced process improvements including AI-assisted bug analysis and standardized oncall responsibilities to limit future tech debt
- Currently building Threads VR, leading workstreams for Profile, feed customization, and app monitoring

Senior Software Engineer @ Avatars

Jan 2024 – Dec 2024

- Led the development of the Style 2 convergence flow, an org-wide effort to consensually migrate all VR users to the modernized 2024 avatar styles
- Led a team of 3 eng in shipping off-body choice images to the VR avatar store, resulting in -19.3% image load latency due to image caching, +7.3% acquisition rate, and +16.7% total acquisitions

Software Engineer II @ Avatars

Aug 2022 - Jan 2024

- Scoped and led development of VR avatar home feed, which increased total acquisitions by 25.3% and provided the merchandising team with an editorial surface to feature brands and collections
- Ran experiments on the FB, Instagram, WhatsApp avatar stores as well to drive acquisition topline metrics

Software Engineer I @ Facebook Marketplace

May 2021 – Aug 2022

- Introduced several targeting and UI iterations to the feed category preferences experience resulting in a cumulative +0.6% in ads revenue (\$8.8K daily), +3.4% in shipped transactions, and -3.3% latency

Software Engineer Intern @ Instagram Ads

May – Aug 2020

- Integrated IG OAuth flow into Ads Manager, allowing 7 million advertisers/day cross-manage FB and IG ads

Apple | Software Engineer Intern @ Wireless Tech

Jan – Apr 2020

JavaScript (React, Electron) + Python (Flask, MongoDB, Amazon S3) + Docker + Kubernetes

- Released an internal file management app for international teams to securely organize logging assets

Dataminr | Software Engineer Intern

Jun – Aug 2019

JavaScript (React, Redux, Enzyme)

- Developed tool to streamline internal dashboard configurations, decreasing setup time from 15 min to < 1 min

Skills

Proficient Languages: JavaScript, TypeScript, Python, C++

Proficient Libraries & Tools: React, React Native, Node, Express, GraphQL, MongoDB, SQL, Git

Education

University of Michigan | B.S.E. in Computer Science

- Web Developer at The Michigan Daily, Student SWE at Little Caesars, Dean's List, University Honors
- Advanced Courses: Web Systems, Databases, User Interfaces, Artificial Intelligence, Information Retrieval
